JONIK NDOVU
FARM

THE FARM BECOMES THE DESTINATION

A destination agro-resort in Segera, Laikipia, Kenya

8 HA OWNED TODAY

~7 HA TO ACQUIRE

US$2.4 M NEW CAPITAL

Farming • Food • Nature • Wellness • Experiences

THE OPPORTUNITY

The starting asset is already here. The destination is not.

Jonik Ndovu Farm owns 8 hectares today; the investment is to build the infrastructure, operating platform and experience.

8 HA
OWNED TODAY

~7 HA
FUTURE ACQUISITION

US$2.4M
NEW CAPITAL TARGET

15 HA
ULTIMATE PROJECT

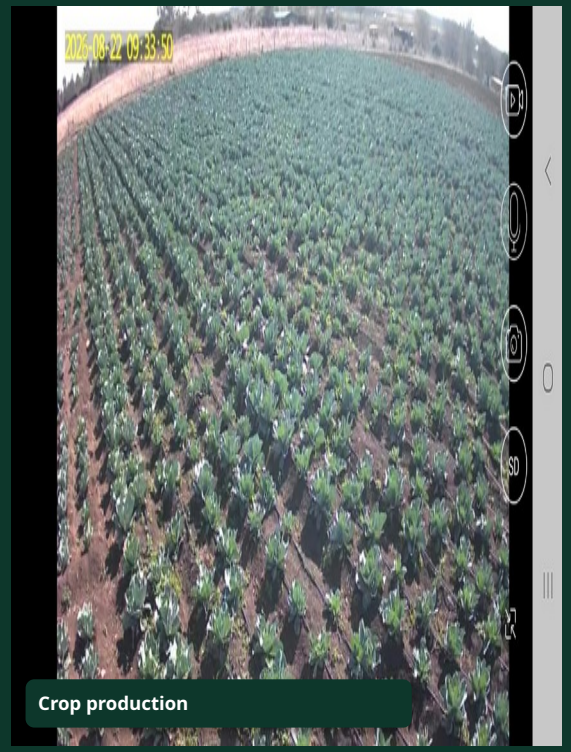

THE INVESTMENT PROPOSITION

Transform an existing agricultural asset into an integrated destination business.

Hospitality provides the commercial engine. Agriculture provides the identity, ingredients, landscape and experiences that differentiate the destination.

An agricultural landscape — not a completed resort.

The supplied farm photographs establish the real starting point.

Crop production

Productive land

Livestock / landscape

Water / site conditions

What exists today

8 hectares owned by Jonik Ndovu Farm • undeveloped as a destination • no completed hospitality infrastructure

THE SETTING IS PART OF THE PRODUCT

LOCATION
VALUE

Laikipia adds a second layer to the farm proposition: wildlife landscapes, open scenery and the potential for Mount Kenya sightlines.

WILDLIFE LANDSCAPE

Wildlife can form part of the wider journey and, where safe and naturally occurring, the guest's sense of place.

THE JOURNEY MATTERS

Approaching the farm through the Laikipia landscape can begin the experience before guests arrive.

MOUNTAIN OUTLOOK

Mount Kenya sightlines are a potential value driver for selected guest spaces and vantage points — to be confirmed by site survey and orientation studies.

FARM + WILDLIFE CONTEXT + LANDSCAPE + MOUNTAIN OUTLOOK → A MORE DISTINCTIVE DESTINATION

Location claims are intentionally framed as potential attributes until exact site vantage points, wildlife movement and access are professionally validated.

WHY THE SETTING MATTERS COMMERCIALLY

The farm is not competing only on rooms. Its value proposition can be built around what guests see, feel and experience before, during and beyond the stay.

01

ARRIVAL

Wildlife and landscape can turn the journey into part of the experience.

VALUE DRIVER

02

STAY

Selected rooms, lodge spaces and viewing points can be oriented toward landscape and — where confirmed — Mount Kenya.

VALUE DRIVER

03

EXPERIENCE

Farm, nature, wildlife context and scenery create multiple reasons to explore beyond the accommodation.

VALUE DRIVER

THE INVESTMENT CASE BECOMES: LAND + FARM + DESTINATION + SETTING

This is a positioning layer, not a claim of guaranteed wildlife sightings or guaranteed Mount Kenya views.

From farm asset → integrated destination.

The project is designed so the agricultural system and guest experience reinforce one another.

FARM

→

INTEGRATED DESTINATION

farm + food + stay + nature + wellness + experiences

→

DESTINATION

A low-density accommodation language rooted in the farm landscape.

Illustrative design direction from the supplied concept imagery; final architecture subject to professional design and approvals.

Clustered farm accommodation

Private lodge / villa

Landscape-integrated villas

The social heart: lodge, food, pool and wellness.

The built environment should feel like an extension of the farm, not a conventional hotel dropped onto it.

Arrival / lodge

Pool + landscape

Pool + wellness

Farm-to-table setting

Agriculture is designed into the destination — visibly and operationally.

Production areas, orchards, livestock and utilities support the guest experience while remaining operationally separated.

Protected / intensive agriculture

Orchard / productive landscape

Livestock infrastructure

Water / utilities / service

DESIGN PRINCIPLE

The farm is not scenery around the hotel. The farm is the experience.

STAY

Accommodation sits within the productive landscape.

EAT

Farm production feeds the food story.

EXPLORE

Trails, gardens and farm activities extend the stay.

REST

Wellness and leisure sit within quieter landscape.

GATHER

Events and retreats create additional occasions.

ONE OPERATING IDEA

Every element should create value for the guest, the farm, or both.

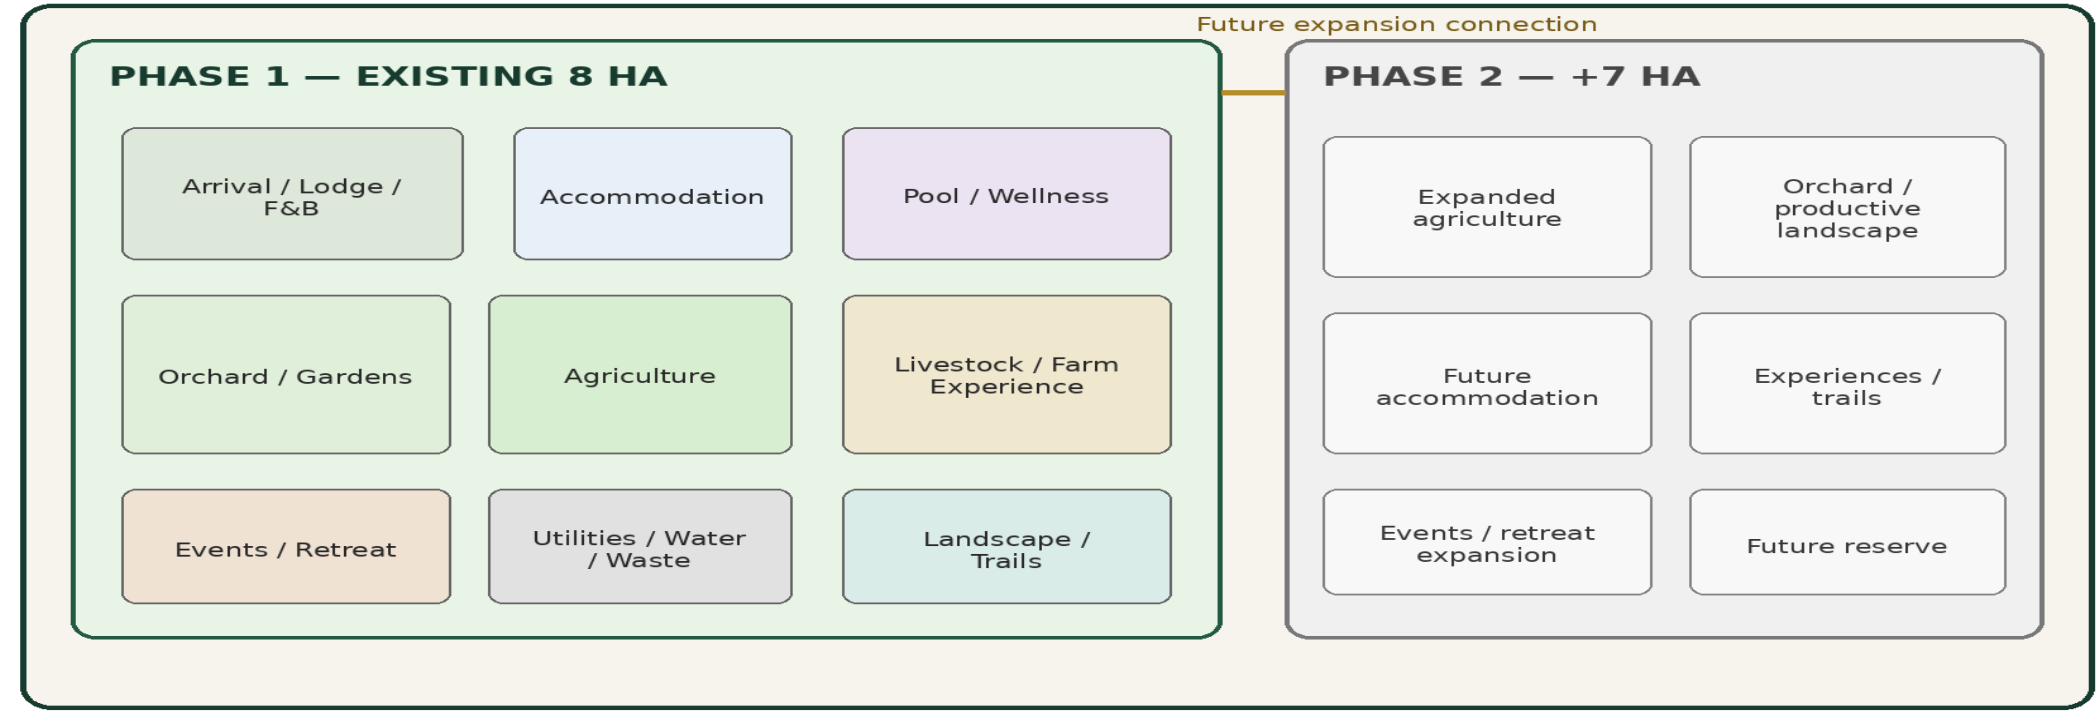

Guests do not simply stay here. They enter the farm.

A destination built around multiple reasons to arrive, stay longer and spend across the property.

One farm. One integrated destination.

Illustrative 15-ha spatial strategy: 8 ha owned today + ~7 ha future acquisition. Not to scale.

The 8 hectares are the development platform — not a completed resort.

Phase 1 creates the core destination on land already owned. Phase 2 extends the concept once additional land is acquired.

PHASE 1

EXISTING 8 HA

Owned by Jonik Ndovu Farm
Currently undeveloped as a destination

Core lodge + F&B
Accommodation
Pool / wellness
Orchard / gardens
Agriculture + livestock
Events / trails
Utilities + BOH

PHASE 2

+ ~7 HA TO ACQUIRE

Future expansion land — acquisition, title, access and pricing to be validated.

Expanded agriculture
Orchard / productive landscape
Future accommodation
Experience trails
Events / retreat expansion
Future reserve

Agriculture, hospitality and infrastructure reinforce one another.

The operating logic is circular: production supports food and experiences; organic outputs can support soil and farm systems.

CROPS

Ingredients + farm sales

ORCHARD

Landscape + produce

THE FARM

ONE OPERATING SYSTEM

LIVESTOCK

Experience + manure

KITCHEN

Farm-to-table F&B

COMPOST

Soil + circularity

GUESTS

Demand + experience

One destination. Multiple revenue engines.

Hospitality anchors the economics; agriculture and experiences create differentiation and additional spend.

Illustrative revenue architecture — not a forecast by itself.

Create the destination in a disciplined sequence.

Indicative phasing; exact programme depends on land acquisition, design, approvals, infrastructure and financing.

01

FOUNDATION

Land + surveys
Water / access / utilities
Planning + EIA pathway

02

DESTINATION CORE

Lodge / F&B
Initial accommodation
Pool / wellness
Farm systems

03

EXPERIENCE LAYER

Trails + gardens
Livestock experience
Events / retreats
Farm shop / education

04

OPTIMISE + EXPAND

Acquire / integrate ~7 ha
Additional accommodation
Expanded agriculture
Future reserve

CAPITAL REQUIREMENT

US$2.4 million of new capital to create the destination.

The raise is intended to fund development of the existing 8 hectares and acquisition of approximately 7 additional hectares.

US$2.4 M

NEW CAPITAL TARGET

LAND

~7 ha acquisition

To be validated

INFRASTRUCTURE

Access, water, power, wastewater, BOH

Illustrative

HOSPITALITY

Accommodation + lodge / F&B

Illustrative

EXPERIENCE

Pool, wellness, events, landscape

Illustrative

FARM SYSTEMS

Agriculture, orchard, livestock

Illustrative

PRE-OPENING

Professional fees, pre-opening, contingency

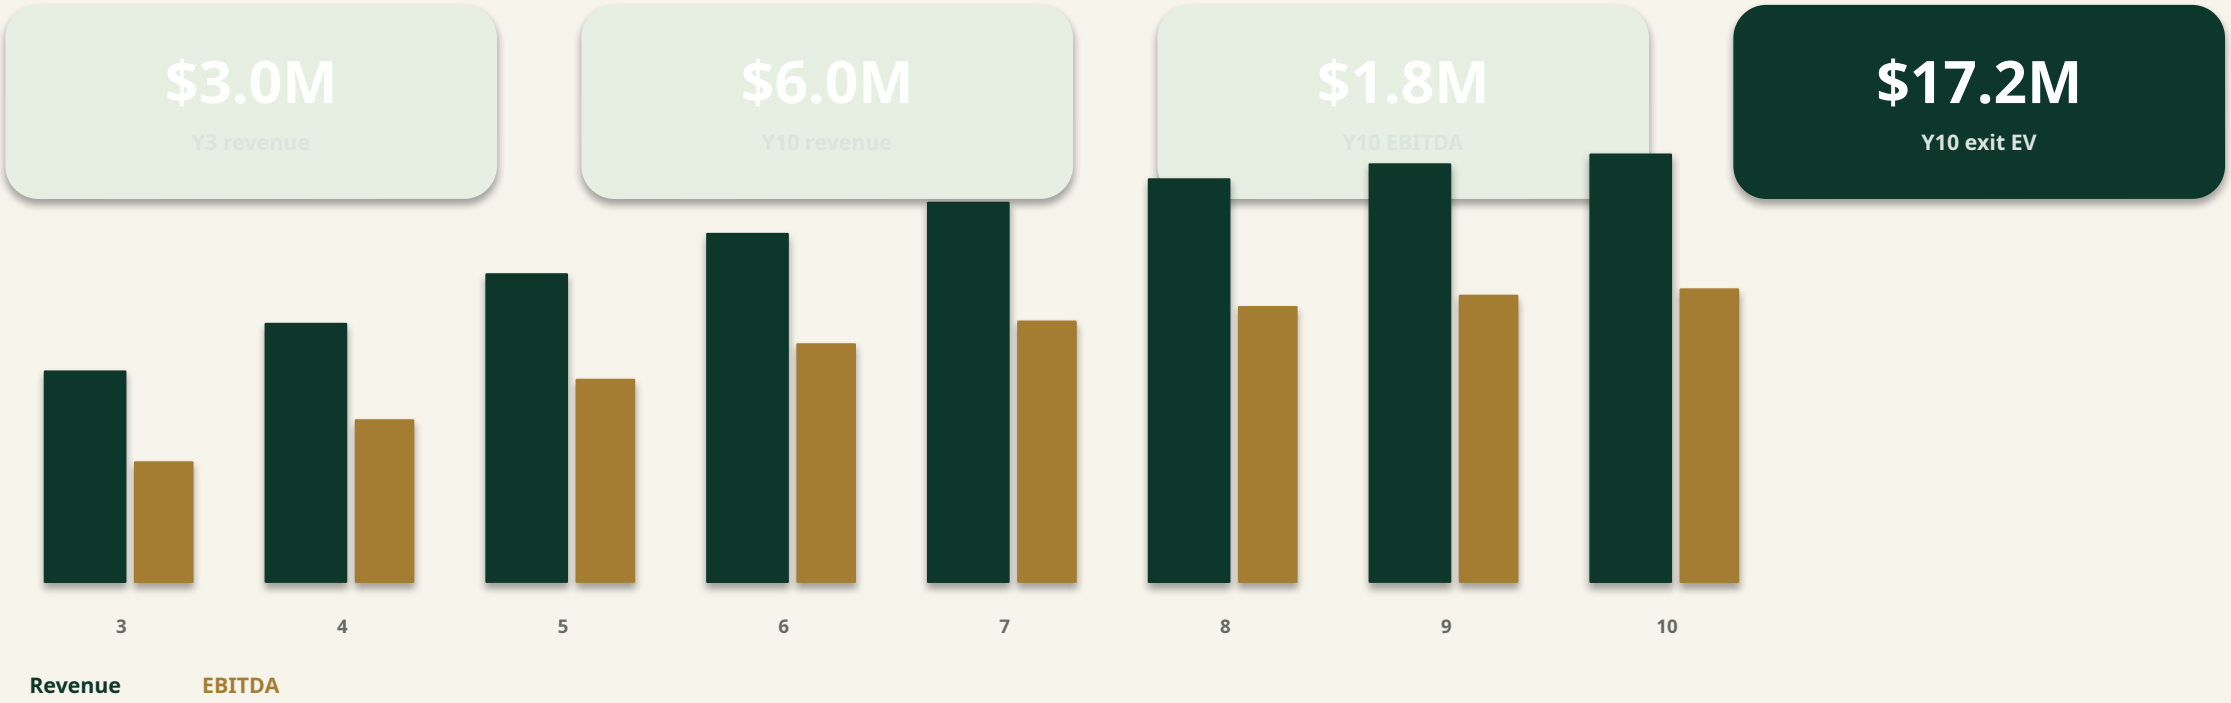

Illustrative

Important: the ~7-ha acquisition cost is currently an input, not a verified price. The development budget must be rebalanced once acquisition evidence is available.

ILLUSTRATIVE BASE CASE

The financial case shows the scale the destination must achieve.

Illustrative operating assumptions — not a valuation, forecast or guarantee.

Base case detailed model: ~9.7% equity IRR / ~2.38x MOIC. Scenario sheet: ~9.8% / ~2.33x due to methodology presentation.

The base case is not the end of the underwriting conversation.

The model shows the operating and exit assumptions that need to be supported by market evidence and a costed development plan.

	IRR	MOIC
Downside	~ -0.5%	~0.96x
Base	~ 9.8%	~2.33x
Upside	~15.4%	~3.56x

The 15%+ return case requires stronger operating performance and/or value than the base case. These are model outputs, not predictions.

Move from concept to investable evidence.

The vision is clear. The next stage is to prove the land, design, market, costs, operations and investment structure.

01 Land: title, boundaries, access and ~7-ha acquisition

02 Site: topography, water, soils, drainage and utilities

03 Design: architecture, landscape, circulation and BOH

04 Market: demand, ADR, occupancy and competitive positioning

05 Costs: QS budget, contingency and pre-opening

06 Operations: staffing, F&B, farm systems and management

07 Legal / approvals: planning, environmental and licensing pathway

08 Investment: structure, governance, investor protections and exit

JONIK NDOVU FARM

THE FARM BECOMES THE DESTINATION.
